

Sustainable Procurement Policy

Hyosung Advanced Materials Corporation (HAMC) faithfully strives to fulfill our economic, social and environmental responsibilities to create a CSE (Creating Social Eco-system) in close cooperation with civil society in purchasing activities to minimize the negative impacts of our business with the following principles.

1. We select suppliers who have the capability and willingness to respond to climate change as well as to prevent negative environmental impacts such as water, soil and air pollution.
2. We select suppliers who fulfill social responsibilities in the workplace ensuring compliance with the International Labor Organization's labor standards, diversity protection, human rights protection and ethical management.
3. We select suppliers who consider the safety of workers as well as their products' users.

Environment-friendly Procurement Policy

Hyosung Advanced Materials abides by the following principles when making purchases, in order to fulfill our responsibilities to the community and the users of our products, through green purchasing activities which contribute to resource preservation and minimize environmental impact.

1. For resource preservation, we refrain from unnecessary purchases to avoid excess supplies.
2. We review not only the quality and price of the products but also their environment-friendliness and prefer eco-friendly products.
3. We make continuous efforts to discover products that use less toxic chemicals, reduce waste, and consume less resources to expand green purchasing.
4. We share our green purchasing policy with our partners/suppliers and encourage their efforts to improve the environment-friendliness of their products.
